

Fire Alarm & Ansul System Permits

Roosevelt Field Mall – Dining District

Fire Alarm, Sprinkler, Automatic Extinguishing System (AES) and Hood/Duct Systems all need to be filed, approved, and installed under the direction of the Nassau County Fire Marshal's Office.

Fire Alarm System Permits

November 15, 2014 - SUBMITTAL DEADLINE

Per the Fire Marshall, Tenants will need to file their applications before November 15, 2014.

If a Tenant has not filed their respective applications before that date they **will NOT be able to open by the projected target date in January, 2015.**

Tenant Contractors are NOT to remove any active Landlord provided FA devices that may be within their Tenant space unless directed by the Fire Marshall. These devices are a required part of the Base Building Life Safety System and are to remain active until Tenant system is installed/active.

Hood/Duct/AES System Permits

VERY IMPORTANT: The Fire Marshall's Office requires the Hood/Duct/AES system permit application must be filed for each Tenant, separately **by locally licensed installers** and there is to be no installation or materials on site for the part of the project unless there is a valid permit issued by their office.

- If this is not followed the contractors and others may be subject to a summons.
- Hood and duct systems requirements are very strict due to likeliness of a fire in those systems when in use.
