### GENERAL NOTES

- Residents may be allowed to connect to the central chilled water system for air conditioning. The system is to be designed to accommodate such a connection.

- The chilled water system is designed for a year-round temperature of 61°F. The system is designed to accommodate temperature fluctuations to accommodate various loads.

### HVAC CRITERIA (continued)

- **NOTICE TO TENANT DESIGN ENGINEER:**
  - The Designer can provide the tenant with a chiller design to meet the project requirements.
  - The tenant shall provide a detailed chiller design to the designer for review and approval.

### PLUMBING CRITERIA

- **WATER HEATERS:**
  - Water heaters are required to be located in the tenant's space.
  - Water heaters shall be insulated to maintain a temperature of 140°F.

### ELECTRICAL CRITERIA (continued)

- **SPECIALTY TENANT CRITERIA:**
  - Specialty tenant criteria are to be provided by the tenant.
  - Criteria shall be reviewed and approved by the designer.

### SPECIALTY TENANT CRITERIA

- **FIRE PROTECTION CRITERIA:**
  - Fire protection systems are to be provided by the tenant.
  - Fire protection systems shall comply with the local fire codes.

### FOOD TENANT CRITERIA

- **KITCHEN DESIGNER NOTICE:**
  - Kitchen designers and kitchen equipment suppliers shall be made aware of the specific requirements of this document as it pertains to specifications and/or installation of services and equipment for Food Servicest Tenants.
